

HCF Meters

- (1) Present reading less previous reading = volume
- (2) Volume multiply by 2.83 (2.8317 for Total Gas & Power Ltd)=A
- (3) A multiply by 1.0226 = B
- (4) B multiply by calorific value (if not shown use 40)=C
- (5) C divided by 3.6 = Number of kWh used.

M3 Meters

- (6) Present reading less previous reading = volume
- (7) Volume multiply by 1.0226 = B
- (8) B multiply by calorific value (if not shown use 40)=C
- (9) C divided by 3.6 = Number of kWh used.

WARNING

If your bill covers a long period and either does not show the calorific value and/or the calorific value is over 40, then it is possible that you have been over-charged to check this send the bill/reconciliation statement concerned to Budget Control. We strongly recommend going to the years 2004-2006 for any customer who received an annual reconciliation for their gas.
